

PROGEAR

PERFORMANCE PLATE

THE ULTIMATE CONTROL

ProGear Performance Plate: Precise – Simple – Light.
Crafted in Switzerland to Micron precision in highest quality Billet anodized Aluminium.

Main advantages

- True connection with the ski leading to better edge control coming in the turn and moving out of the turn with more angle.
- Raised heel piece brings a natural athletic stance on the ski allowing optimal front foot balance.
- Precision design offers increased stability leading to accurate and confident skiing.

Key features

- Direct control to the ski through precision design and tight fit with the boot
- Natural toe stance through 8mm (5/16") heel raise
- Optimized low imprint on the ski for smoother flex pattern
- MicroJust rails on heel piece for precision fit with the boot
- MicroGrip slot for precision mounting on the ski
- Fits all boots and sizes
- Fits all release systems

Mounting recommendations & Operator's manual

- Mount your release system on heel piece with provided screws.
- Adjust heel piece for a snug fit with the boot.
- MicroGrip red washer must be positioned with arrow pointing forward.
- **Always ski 2 passes free skiing slowly to test correct fitting of your new plate.**

Warning

High performance binding. For use by experienced skiers only.

Use of this product and participation in water sports involves inherent risks of serious injury or death. Even if properly fitted, the binding may or may not release which could result in injury. To reduce risks observe the following: Binding should be properly fitted to a snug fit. Be sure to use the correct size. Binding must not be used by others for whom it was not properly fitted. Read operator's manual before use.

PROGEAR

PERFORMANCE PLATE THE ULTIMATE CONTROL

Description

1. Arc shape for gradual flex connection with the ski
2. Center line markers
3. Aluminium one piece front bridge
4. Flex holes elongated
5. MicroJust rails for precision boot fitting
6. Aluminium raised heel piece (8mm – 5/16" rise for athletic stance)
7. Two holes adjustment possibilities and heel piece can also be reversed (left goes right) for additional adjustments if needed.
8. MicroGrip mounting rail for precise binding placement on the ski

Front bridge and heel piece are highest grade Billet Aluminium machined by CNC to micron precision. Both parts have stainless steel Heli-Coil inserts for strong and infinite screwing to the plate with stainless steel M6 screws.
